FOREWORD

This report lists the leading 500 prime contractors according to the net value of awards over \$10,000 for research, development, test, and evaluation (RDT&E) work during fiscal year 1980. For the first time the report has data for the Civil Functions of the Army Corps of Engineers incorporated into all tables. Previous editions presented statistics on military prime contract awards only. The list is arranged in four sections: (1) U.S. Business Firms; (2) Educational and Nonprofit Institutions; (3) Foreign Contractors; and (4) U.S. Government Agencies.

Contractors in all sections are ranked in a single sequence so that only one contractor in the report is number one. The alphabetical index shows the section in which each contractor is located and his rank. The geographic locations shown are those where the work was expected to be performed. Generally, the location is a contractor's plant, laboratory, or other facility. However, if the work was scheduled to be performed at a defense activity, such as an Air Force Base, the location is the defense activity rather than the contractor's plant.

The following table shows the distribution of RDT&E awards for all contractors and for the top 500. The 1980 distribution varies only slightly from that for 1979. In 1980, the top 500 consisted of 375 U.S. firms (176 of which were small business firms); 113 educational and nonprofit institutions; 7 foreign contractors; and 5 U.S. government agencies. In fiscal year 1979, the top 500 consisted of 368 U.S. firms (186 of which were small business firms); 121 educational and nonprofit institutions; 5 foreign contractors; and 6 U.S. government agencies. There are 96 new contractors on the fiscal year 1980 list compared to 95 new contractors in 1979. Inclusion of fiscal year 1980 data for the Civil Functions, which totaled \$13 million, did not greatly affect the

NOTE: Totals may not add due to rounding.

distribution of RDT&E awards for fiscal year 1980. In fiscal year 1980, \$12 million or 92 percent of the Civil Functions RDT&E awards were made to one company, Harris, Fred, R. Inc., resulting in a ranking of 97.

In addition to the 500 listed contractors, there were 1,526 other contractors for whom RDT&E procurement actions in excess of \$10,000 were reported, making a total of 2,026 contractors during fiscal year 1980. The top 500 RDT&E contractors received awards totaling \$9,253 million compared to \$8,378 million in FY 1979 for an increase of \$875 million, or 10 percent. The \$9,253 million represents 97.7 percent of the \$9,470 million total prime contract awards over \$10,000 for RDT&E work in fiscal year 1980.

Of the 23 contractors with RDT&E awards of \$100 million or more in fiscal year 1980, 20 were large U.S. businesses and 3 were educational and other nonprofit institutions. These 23 contractors had a total of \$5,944 million in RDT&E awards. In fiscal year 1979, there were 19 contractors who attained the \$100 million plateau with total awards of \$5,184 million, of which 16 were large U.S. businesses and 3 were educational and other nonprofit institutions. The amount of awards for the \$100 million group showed an increase of \$760 million, or 14.7 percent, between fiscal years 1979 and 1980.

The following figures show the type of RDT&E engaged in by the contractors and the overall total for each of the programs within those types. Engineering development accounted for the majority (42.1%) of the RDT&E awards followed by advanced development (19.4%). Within the RDT&E types, the contractors with the largest value of awards were involved in the research, development, test, or evaluation of missile systems and electronic and communications equipment. In fiscal year 1980, \$5,780 million or 61.0 percent of all RDT&E awards over \$10,000 was for work connected with these programs.

TYPE	AWARDS (\$000)	PERCENT OF TOTAL
